

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	01 October 2026
Team ID	SWTID-2026-2391
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement:

ServiceNow users need controlled access to Institution Details records so that only authorized users can view, create, write, and delete records according to their roles, while EEE branch records are protected from unauthorized viewing.

Step-2: Brainstorm, Idea Listing and Grouping

Idea	Category	Description
Role-based Read ACL	Access Control	Allow only users with the required role to view records.
Branch-based Read Restriction	Data Security	Allow authorized users to view only EEE branch records.
Script-Controlled ACL	Automation	Use a script to evaluate user roles and permit or deny access.
Separate Create ACL	Access Control	Use bb2 role to control record creation.
Separate Write ACL	Access Control	Use bb3 role to control editing of records.
Separate Delete ACL	Access Control	Use bb4 role to control deletion of records.
Administrator Override	Administration	Allow administrators full access regardless of branch or role restrictions.
Role Combination Control	Authorization	Require the appropriate combination of bb1, bb2, bb3, and bb4 roles for different operations.

Step-3: Idea Prioritization

Prioritized ideas based on their direct contribution to secure record-level access:

Priority	Idea	Reason
1	Script-Controlled ACL	Directly evaluates roles and controls access.
2	Branch-based Read Restriction	Protects EEE records from unauthorized viewing.
3	Role Combination Control	Controls permissions for different record operations.
4	Separate Create / Write / Delete ACLs	Provides operation-specific permissions.
5	Administrator Override	Ensures administrators retain full access.

Selected Concept: Implement a script-controlled ACL framework in ServiceNow using role-based permissions and a Branch condition to secure the Institution Details table.
