

Ideation Phase

Define the Problem Statements

Date	01 October 2026
Team ID	SWTID-2026-2391
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field
Maximum Marks	2 Marks

Customer Problem Statement :

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a ServiceNow administrator / authorized user	control access to Institution Details records based on the Branch field and user roles	users with different roles must have different permissions for viewing, creating, editing, and deleting records	unauthorized users should not be able to view or modify sensitive records, while administrators need full access	concerned about unauthorized access and the need for clear record-level security
PS-2	a user who is authorized for the EEE branch	view and work with EEE branch records according to my assigned permissions	access must be controlled using the appropriate bb1, bb2, bb3, and bb4 roles for read, create, write, and delete operations	different users should only receive the record operations permitted by their assigned roles	secure knowing that access is restricted according to the required roles and branch condition
