

Acceptance Testing
UAT Execution & Report Submission

Date	01 October 2026
Team ID	SWTID-2026-2391
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Script-Controlled ACL – Restrict Record Access Based on Field Value project at the time of the release to User Acceptance Testing (UAT). Eight test cases covering READ, CREATE, WRITE, DELETE and administrator access were defined; seven were executed by impersonating users and one (TC-008) is pending re-test. One open observation (BG-001) is recorded in the UAT template.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

No defects were resolved or closed during UAT. The only open item, BG-001 (Medium, In Progress), is the READ ACL script not checking the Branch field; the fix (`current.u_branch == 'EEE'`) is defined and will be counted as Fixed after TC-008 passes.

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Section	Total Cases	Not Tested	Fail	Pass
READ ACL (Script-Controlled)	3	1	0	2
CREATE ACL (bb2)	1	0	0	1
WRITE ACL (bb3)	1	0	0	1
DELETE ACL (bb4)	1	0	0	1
Administrator Access	1	0	0	1
Restricted Access (bb1 only)	1	0	0	1
Totals	8	1	0	7
